EDUCATION

Egypt University of Informatics

Bachelor of Computer Engineering, GPA: 3.71

New Administrative Capital, Egypt

Oct. 2023 – Present

University of California, Irvine (Coursera Specialization)

Programming with Google Go Specialization

Remote

Jan. 2026

EXPERIENCE

Full-Stack Intern & Developer

Nftrix

May 2025 – Jul. 2025

Cairo, Egypt

- Developed RESTful backend services in Django.
- Integrated PostgreSQL queries and optimized data retrieval for telemetry analytics.
- Developed frontend pages using recursive algorithms for visualizing tree-like components from the database.

Full-Stack Intern

ITIDA

Dec. 2025 – Jan. 2026

New Administrative Capital, Egypt

- Developed full-stack features for an equipment booking and management system using React and Node.js.
- Used containerization tools such as Docker Compose for full-stack development.
- Used Git and GitHub branches to build and test features before merging into production.

PROJECTS

Solvex | *Next.js, Prisma, PostgreSQL*

University Club Platform

- University club platform connecting professors with students for internships and research opportunities.

Homelab & Proxmox | *Proxmox, Docker, Jenkins*

Self-Hosted Infrastructure

- Self-hosted bare-metal hypervisor on repurposed hardware running Minecraft servers, Jenkins CI/CD pipelines, AI object detection, and OpenMediaVault for Linux backups.

EngDen | *Django, React, PostgreSQL*

Student Learning Platform

- University student learning platform with secure university email login, AI-monitored topic-based MCQs for content quality, and self-hosted via Cloudflare tunneling.

TypologyDen | *React, Supabase, Gemini API*

MBTI Job Recommender

- MBTI-based job recommendation system using Jungian cognitive functions; features a bingo-style personality test and leverages Gemini API for consistency verification and weighted job recommendations.

Object Detection App | *FastAPI, YOLOv8, WebSockets*

Real-Time CV

- Real-time object detection application using YOLOv8 and WebSockets over FastAPI for low-latency video processing.

TECHNICAL SKILLS

Languages: Python, JavaScript, Go

Frameworks: Django, FastAPI, React, Next.js, Gin (Go), GORM

Developer Tools: Git, GitHub, Docker, Docker Compose, Jenkins, Unix CLI
